

GLOVING

Follow these safety procedures whenever you come in contact with blood or body fluids that might contain blood. Also follow them when diapering or cleaning. Remember: gloves are for one time use only.

Put on a clean pair of gloves.

Provide the appropriate care.

Remove each glove carefully. Grab the first glove at the palm and strip the glove off. *Touch dirty surfaces only to dirty surfaces.*

Ball up the dirty glove in the palm of the other gloved hand.

With the clean hand, strip the glove off from underneath at the wrist, turning the glove inside out. *Touch clean surfaces only to clean surfaces.*

Discard the dirty gloves immediately in a step can. Wash your hands.
